Co-funded Energy Innovation How Businesses Can Benefit From SmartHubs

Join Connected Energy and West Sussex County Council for their **second webinar** delving into project SmartHubs
13.00, Wednesday November 11th, 2020

Businesses in West Sussex are invited to join a cutting edge £31m project to install clean technologies on their sites: helping save money, generate revenue, and reduce their carbon footprint.

Find out how the project is progressing and learn about how you can get involved in project **SmartHubs**, and access transformative systems at a substantial discount via 35% funding from Innovate UK. Subject to feasibility studies in some instances 100% funding is available.

During the webinar we will discuss how the project could help you to reduce energy costs, optimise your use of energy, and ultimately help reduce the environmental impact of the energy you use.

This is your chance to be part of an innovative, low-carbon energy system of the future.
